

Practical Assignment 2

Group 40

Resubmission

Description

The OLAP schema consists of four **Dimension tables: Time, Product, Branch, and Customer**. Each dimension contains hierarchies that support different levels of data aggregation as follows:

Time

- Day -> Month -> Quarter -> Year
- Day -> Week

Product

- Product -> Category

Branch

- Branch -> Region

Customer

- Customer -> Age Group

The Sales Fact table can be described by these four dimension tables through foreign key relationships. It stores the measurable sales data.
